QUALITY ACCREDITATION AWARDED TO THE HMFEF

Navy achieved a milestone on 26 August 2005, when the Hydrographic, Meteorological and Oceanographic FEG was certified as a 'Quality Endorsed Company' under ISO 9001:2000. This is a major achievement for the RAN and the HMFEF as the certification is against an internationally recognised quality benchmark that will be regularly and rigorously tested by auditors.

The HMFEF has been certified for the production and distribution of nautical charting products and services, and the support provided to the Hydrographic Survey Force to enable data acquisition. The future intention is to expand upon this initial achievement and build the quality management system to incorporate the Directorate of Oceanography and Meteorology (DOM), and the data acquisition process within the Hydrographic Survey Force (HSF).

For further information contact: LCDR John Sperring on Mobile 0407-074 154 or Office 02 - 4221 8670.

Issued under the authority of The Hydrographer of Australia.
