New Zealand Notices to Mariners

The substance of these notices should be inserted on the charts affected.

Notices to Mariners information relating to British Admiralty Publications unavailable on this web site at this stage but still available in printed form:-

- Section II. Corrections to Admiralty List of Lights, Vol K.**
- Section V. Corrections to Admiralty List of Radio Signals.**
- Section VI. Corrections to Sailing Directions.**
- Blocks included after Section VI.**

Bearings are referred to the true compass and are reckoned clockwise from 000° (North) to 359°: those relating to lights are given as seen by an observer from seaward. The range quoted for a light is its nominal range. Fog signals are sounded only during thick or foggy weather, unless otherwise stated Depths are with reference to the chart datum of each chart. Heights are above mean high water springs or mean higher high water, as appropriate.

The capital letter (P) or (T) after the number of any notice denotes a preliminary or temporary notice respectively, which are contained separately at the end of the permanent notices. A star () adjacent to the number of a notice indicates that the notice is based on original information.*

Mariners are particularly requested to notify the AUSTRALIAN HYDROGRAPHIC OFFICE, Locked Bag 8801 South Coast Mail Centre, NSW 2521 (Fax 02-4221 8599), e-mail hni.hydro@navy.gov.au or, alternatively by filling in and submitting the [Hydrographic Notes](#) forms, immediately on the discovery of new dangers or suspected dangers to navigation. For changes or defects in aids to navigation notify AusSAR (Fax 02-6230 6868).

Copies of these notices can be obtained from the AUSTRALIAN HYDROGRAPHIC OFFICE, 8 Station Street, Wollongong, the Agents for the sale of Australian and Admiralty charts in Australia, and from the Australian Maritime Safety Authority (AMSA) Offices, in the major ports of Australia

**CUMULATIVE LIST OF AUSTRALIAN
NOTICES TO MARINERS
OCTOBER 1998**

Prepared by the Hydrographic Service
by direction R.J. WILLIS
Hydrographer, RAN.

CUMULATIVE LIST OF AUSTRALIAN NOTICES TO MARINERS

General Information

1. This list identifies, by its chart number and current edition, each Australian (Aus), British Admiralty (BA) and International (INT) navigational chart of the Area of Australian Charting Responsibility (see *Australian Notice to Mariners No 1 of 1998*).
2. Unless a Chart Correction Log (NP 133) is being used to perform a similar function, then, until a new edition is published in April 1999, this list should be corrected up to date from the information given in Section I of successive Editions of Australian Notices to Mariners by:
 - (a) adding new charts, each with its date of publication;
 - (b) amending the dates and deleting the listed Notices to Mariners for charts of which new editions have been published;
 - (c) deleting all reference to charts that have been withdrawn; and
 - (d) adding the numbers of the appropriate Notices to Mariners against each relevant chart.
3. All Notices to Mariners that have affected each chart during the last two years are listed against it. These notices are Australian unless indicated as British Admiralty (BA). If the chart has not been affected by a notice during that period then the most recent notice, if any, is shown.

The Current Edition of a Chart

4. When a new chart is first published the date of publication is shown in the publication note that appears below the centre of the southern outer border; this date remains unchanged throughout successive new editions. The date of each new edition is printed on the chart a few centimetres to the right of the publication note.
5. A new edition or large correction, on being published and issued as notified by a Notice to Mariners becomes the current edition and the previous edition is superseded. When a chart is withdrawn as directed by a Notice to Mariners there ceases to be any current edition of it. Withdrawn charts and superseded editions should not be used for navigation, nor should current editions that have not been corrected for relevant Notices to Mariners.
6. Users of this cumulative list are reminded that the authoritative source for information concerning current editions of charts and the corrections that affect them in the Australian Area are Editions of Australian Notices to Mariners.
