

AUSTRALIAN NOTICES TO MARINERS

Notices 409 - 455

Published fortnightly by the Australian Hydrographic Office

Australian Notices to Mariners are the authority for correcting charts and publications published by the Australian Hydrographic Office covering Australia, Papua New Guinea, Solomon Islands, Australian Antarctic Territory and Timor-Leste.

Commodore D.G. MULLINS, RAN
Hydrographer of Australia

SECTIONS.

- I. **Australian Notices to Mariners, including blocks and notes.**
- II. **Hydrographic Reports.**

SUPPLEMENTS.

- I. **Tracings**
 - II. **Cumulative List of Australian Notices to Mariners.**
 - III. **Cumulative List of Temporary and Preliminary Australian Notices to Mariners.**
 - IV. **Temporary and Preliminary Notices in force.**

IMPORTANT NOTICE

This edition of Notices to Mariners includes all navigationally significant information affecting AHO products which the AHO has become aware of since the last edition. All reasonable efforts have been made to ensure the accuracy and completeness of the information, including third party information, on which these updates are based. The AHO regards third parties from which it receives information as reliable, however the AHO cannot verify all such information and errors may therefore exist. The AHO does not accept liability for errors in third party information.

GENERAL INSTRUCTIONS

The substance of these notices should be inserted on the charts affected.

Bearings are referred to the true compass and are reckoned clockwise from North; those relating to lights are given as seen by an observer from seaward.

Positions quoted in notices relate to WGS84 which is the horizontal datum for all charts produced by the Australian Hydrographic Office.

The range quoted for a light is its nominal range.

Depths are with reference to the chart datum of each chart. Heights are above mean high water springs or mean higher high water, as appropriate.

The capital letter (P) or (T) after the number of any notice denotes a preliminary or temporary notice respectively, which are contained separately at the end of the permanent notices.

REPORTING OF DANGERS

Mariners are particularly requested to notify the AUSTRALIAN HYDROGRAPHIC OFFICE, Locked Bag 8801 Wollongong, NSW 2500 (e-mail datacentre@hydro.gov.au or, alternatively by filling in and submitting the [Hydrographic Notes](#) forms located on the web site – www.hydro.gov.au), immediately on the discovery of new dangers or suspected dangers to navigation. For changes or defects in aids to navigation notify AusSAR (Fax 02-6230 6868 or email rccaus@amsa.gov.au).

AUTHORISED USE

Copies of Australian notices are available free of charge from the Australian Hydrographic Office (AHO) website (www.hydro.gov.au) and through the eNotices (email) service (www.hydro.gov.au/enotices/enotices.htm).

Individual Notices may be copied for the purpose of inserting Notice substance on official charts and publications. Paper copies may be printed by chart agents and distributed to customers on a cost recovery basis. Participating chart agents are listed on the AHO website as providing a 'Paper Notices to Mariners' service (www.hydro.gov.au/prodserv/agents-list.htm). Copies of the notices may not be sold for profit without prior written agreement.

Chart permanently withdrawn

Charts listed above as withdrawn no longer meet chart carriage requirements and should be marked as "superseded" and replaced with the new chart/ new edition listed prior to passage through the area covered by the new chart.

When placing orders with a chart agent between notice of forthcoming edition and its publication, mariners should advise whether their order pertains to the current edition or the new edition.

For further details refer to the AHO website at www.hydro.gov.au for new edition and new chart stock arrival information.

Aus 4060 (INT 60)	Australasia and Adjacent Waters	1:10 000 000	New edition with general updating throughout; including updates to magnetic variations.

411 AUSTRALIA - Australia's Transition to S-100 Universal Hydrographic Data Model

Australian Hydrographic Office

The International Hydrographic Organization's (IHO) **S-100 Universal Hydrographic Data Model** is a new, modern standard for maritime products and services, set to be adopted in 2026. This framework is based on modern ISO geospatial standards and will eventually replace the older S-57 standard.

S-101 will be the new product specification for Electronic Navigational Charts (ENCs). From 2029, it will operate alongside S-57 products on "Dual Fuel" ECDIS (Electronic Chart Display and Information Systems) during a transition period.

Beyond S-101, the S-100 framework allows for additional, interoperable product layers that can enhance ENCs. Notable examples include:

S-102: Bathymetric Surface

S-104: Water Levels

S-111: Surface Currents

Operational Rollout

The AHO will release by 29 May 2026, the following products;

101AU005BTB01, 101AU00434151, 101AU00435151

102AU006BTB01, 101AU006BTB02, 101AU006KUR01

104AU00_BotanyBay_YYYYMMDD_YYYYMMDD (36 files for 2026 covering Botany Bay – based on Astronomical Predictions)

S-100 coverage will continue to expand in the coming years until S-101 ENC coverage fully replicates its equivalent S-57 portfolio. The IMO (International Maritime Organization) is expected to officially sunset the S-57 standard once there is comprehensive, worldwide S-101 coverage.

For more information, please refer to [Australian Hydrographic Office - S-100: Next Generation Maritime Products and Services](#)
